

## Stay Informed and Involved on the Jobsite

Connect to the jobsite from anywhere with OxBlue construction cameras. With a real-time look at the project, you can strengthen communication, navigate jobsite changes and promote the end result with ease.

### Remotely monitor what's happening in the field with live visuals and video.

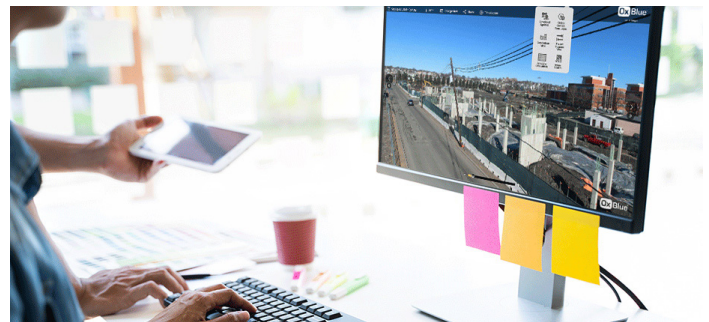

Access the jobsite on any device through the easy-to-use online app. See projects in real-time, review image history or watch weeks worth of progress in a matter of seconds with time-lapses.

- View the project on your phone, tablet or computer
- Stream the jobsite live or access video on-demand
- Generate custom time-lapses instantly in the app

### Strengthen communication with construction teams to keep projects on schedule.

Easily collaborate with jobsite personnel using built-in sharing and mark-up tools. Within one app, you can schedule automatic updates for OAC meetings, follow up with changes and ensure work is done to specifications.

- Compare images side-by-side or with overlay
- Build and access photo galleries
- Mark observations and create RFIs within the app

### Promote your work with stunning, cinematic time-lapses.

Share your wow-worthy work at the end of every project with a professionally-produced time-lapse video. Created in-house, you'll have a powerful marketing asset that puts your skill and expertise in the spotlight.

- Get one free time-lapse with every project
- Choose from 4K Ultra or 1080p HD resolution
- Add your branding, music and visual effects for customization
