Mission Critical Facilities with ease

General contractors need to carefully construct data centers in a way that allows for multi-phased turnovers, so facilities can begin operations before the job is completed. Developers need close-up views of these expansive centers to monitor schedules and secure facilities after hours. Owners and enterprises need to know that operations won't be interrupted by construction progress.

OxBlue construction cameras provide the necessary visibility and real-time insight that all parties need to keep projects running smoothly. With live streaming solar cameras, advanced project analytics and live surveillance monitoring, OxBlue is the all-inclusive solution for protecting mission critical facilities.

With demand for power and cloud services rapidly expanding, enterprises need critical facilities up and running, fast.

No matter your role, our secure camera feeds can document progress, streamline communication and help safeguard materials.

"There is peace of mind in being Access critical projects on demand able to track progress without having to fly to the site, which in turn is a money and time saver for many." — Compass Data Centers Manage the construction of mission critical facilities for elite technology and enterprise businesses with ease. OxBlue cameras provide a highquality view and the project analytics needed to prevent rework and deliver

on time.

Generate results no matter the project with construction cameras

Every project requires three fundamental components to build success:

- · Clear communication
- · Visibility on the jobsite
- · Efficient resource management

Construction cameras deliver these results by providing real-time visuals and straightforward access to what's happening on site. Images and video make it clear where things are on track or falling behind schedule, helping determine if a site visit is necessary.

MANAGE

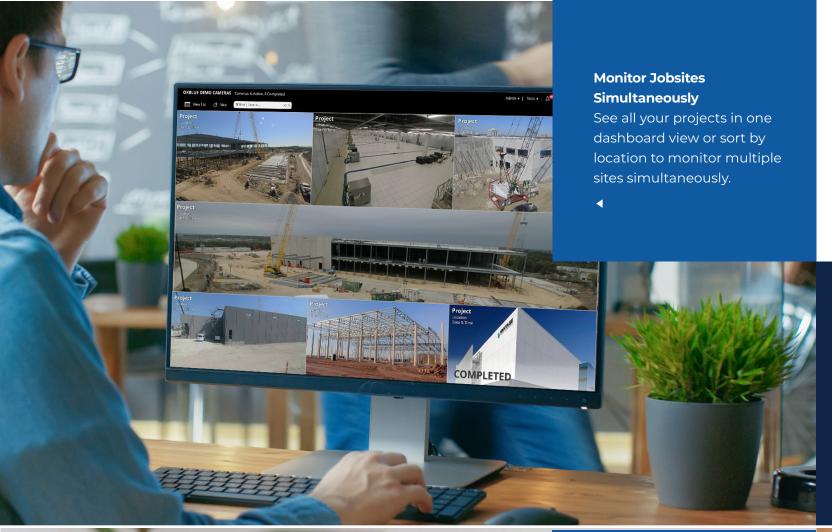

"By viewing the job site in real time, we can verify work in place, identify any performance issues, and have more visibility to things we could possibly do differently."

— RaceTrac

With the OxBlue Interface, it's easy to increase communication with one-click sharing features, remote access to the jobsite and user controls that allow for a closer look.

At the same time, OxBlue construction cameras include features that can help standardize points of data. Using the advanced capabilities of the camera, it's easy to detail performance in new ways. Weekly Activity Analysis can show who routinely sticks to schedule and premium analytics can emphasize a team's ability to adjust to unexpected interruptions. All of this important information gives a detailed look at what's been done and what clients can expect to see.

View Progress Remotely Access the inherite on any of

Access the jobsite on any device at any time using video on demand or live streaming.

Schedule Updates

Define a schedule to routinely send images and/or time-lapse videos to yourself or others.

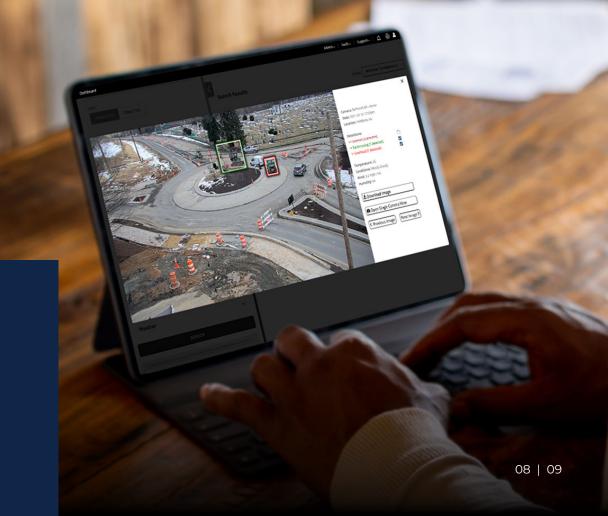

Monitor Weather Impact

Quickly see if weather conditions have impacted progress or performance with a grid that highlights precipitation, humidity, wind and temperatures.

Equipment Notification

Track movement of 11 different types of equipment on site

Activity Analysis

Compare jobsite activity with weather events to ensure teams are maintaining schedules and working at peak performance levels.

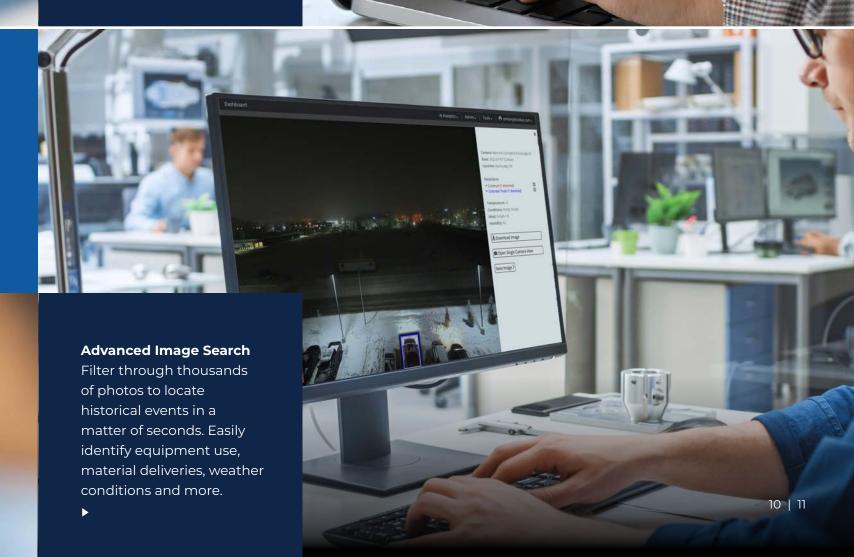

Watch the jobsite in realtime and ensure safety compliance levels across projects. OxBlue's Al looks for standard PPE compliance and highlights potential issues.

Custom Notifications

Set activity, safety, and weather alerts so you can quickly identify important priorities and know when your attention is needed on site.

Understand your jobsite in-depth with dynamic visuals

On any given day, project managers and general contractors have a list filled with tasks and small details — taking time and attention away from project priorities.

OxBlue offers an easy way to take control of the jobsite with our advanced construction cameras and visual documentation services. What's captured by a construction camera is a clear, unbiased history of what happens in a day.

"Even though the project was 100 miles away, we were always able to pull up the interface, see what was going on and easily catch up on the latest progress."

— Lumar Devco, LLC

DOCUMENT

Our time-lapse features and activity analysis serve up key information about the jobsite — detailing an entire day of work in just 30 seconds. The visual record makes it easy to review progress, validate work hours and detect issues that could impact the project.

Showcase your work and strengthen your bidding process

There's more behind the build than just the finished product.

Showing the full story of a successful project means highlighting not only progress, but the data used to outperform the competition.

Construction cameras document the details so professionals can visually share results.

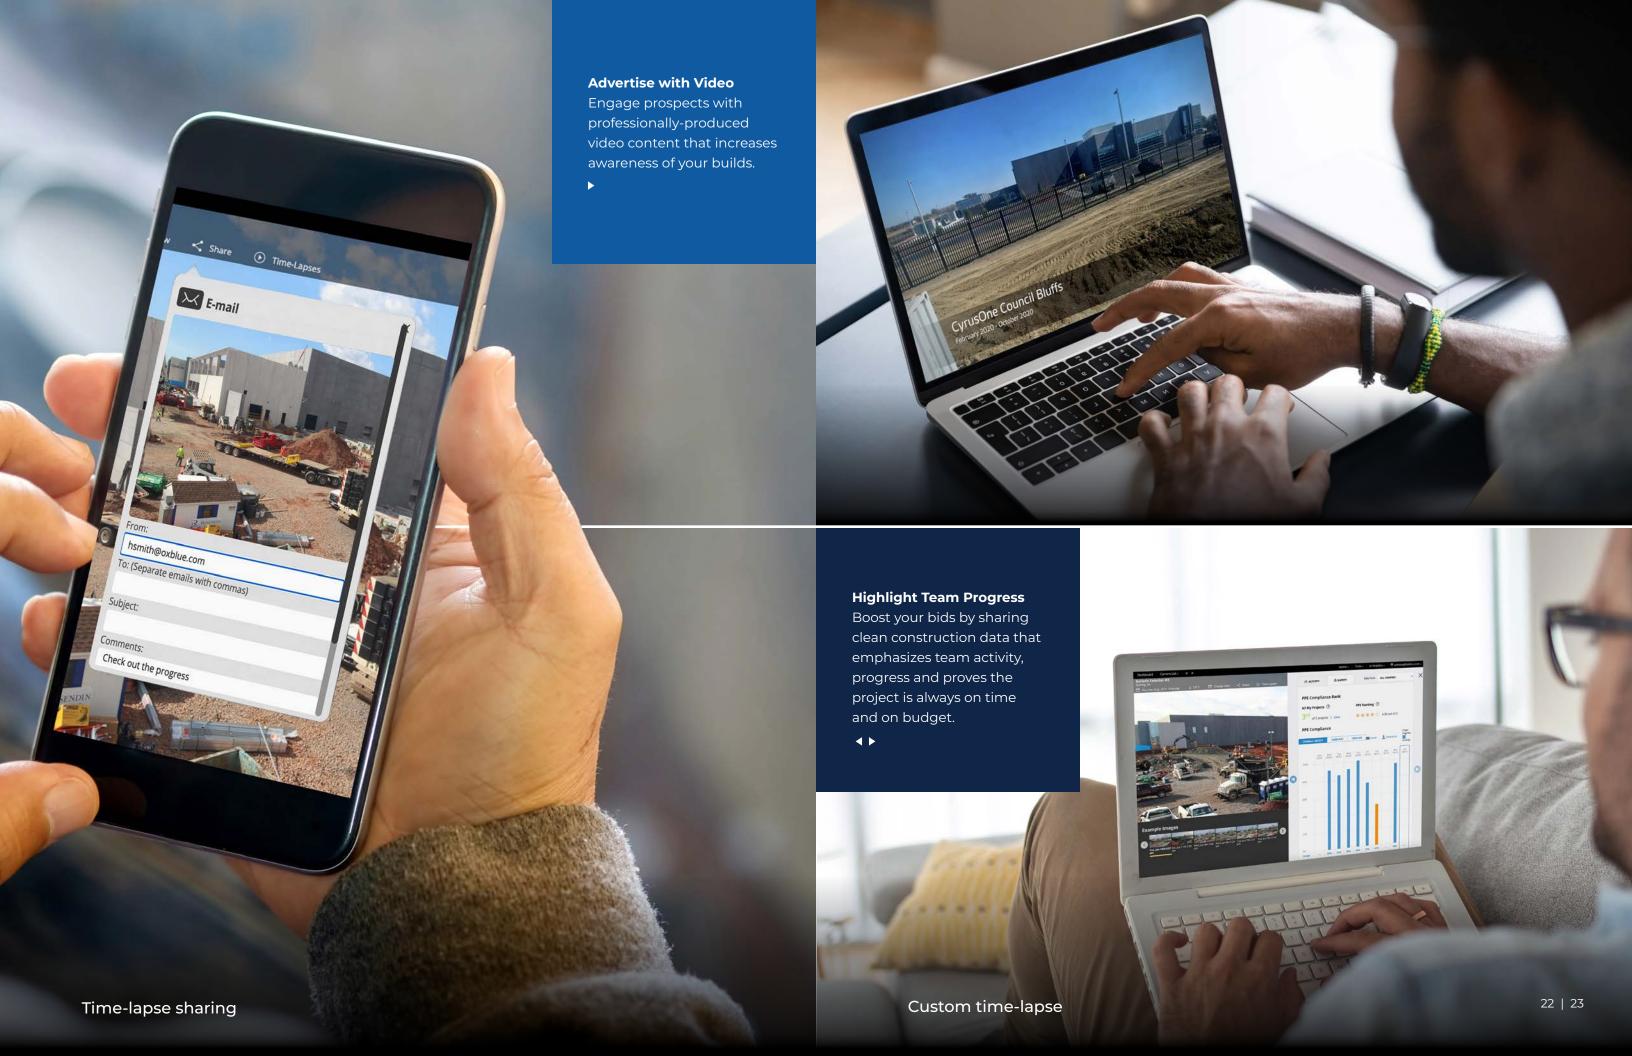

MARKET

"It was everything we expected for our project... we are very satisfied with the results."

— Homewood Flossmoor High School

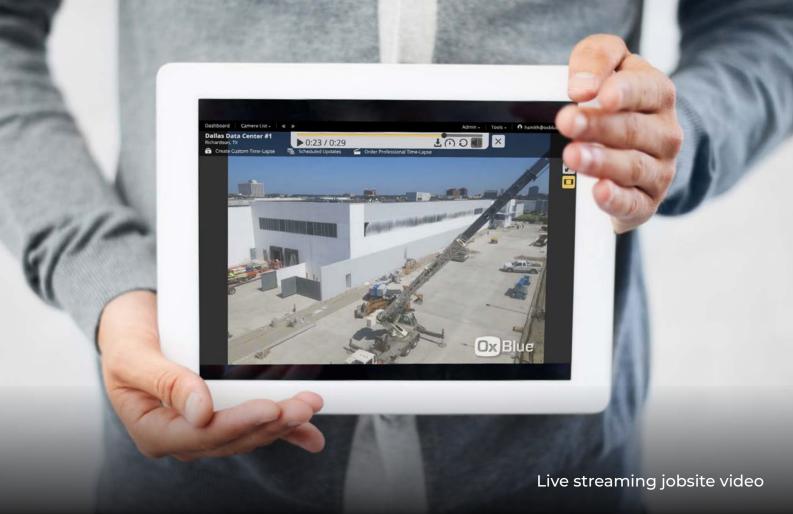

Time-lapse features are powerful marketing tools that share months worth of activity in a beautifully-edited cinematic format. This short video content can capture the attention of an audience on social media, websites and in proposals. It shows the extent of work done on the project and the dramatic results.

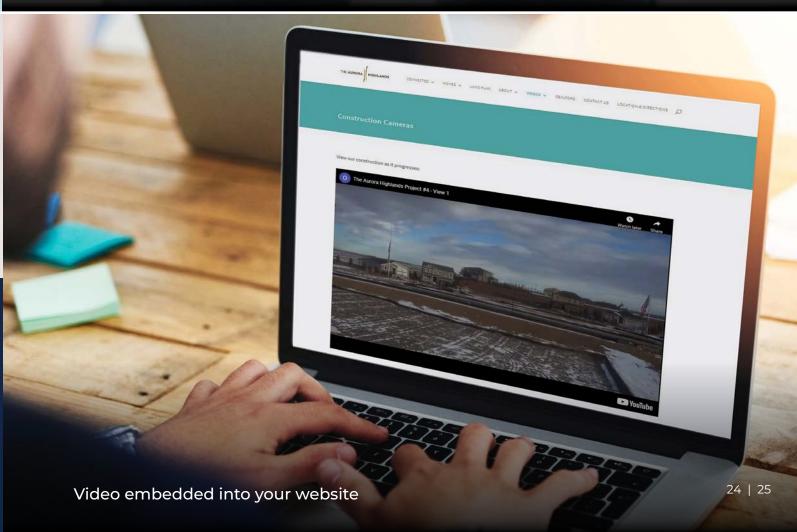

Generate Custom Content Create time-lapses based on your own perimeters to share updates on project progress. ◆ ▶

Share to Social Media Instantly share images, video or time-lapse clips from OxBlue's web app with just a click.

VISUALIZE.

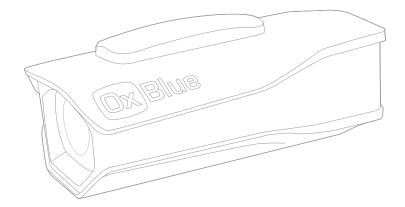

Your Job in Plain Sight

Open a new realm of understanding into your jobsite with OxBlue's powerful time-lapse and visual data camera systems.

"We can clearly see what floor the project's on, what's complete you get a much better feel for what's happening on the jobsite."

-KDC
