

NON-PENETRATING ROOF MOUNT

Install your construction camera without mounting it to a permanent fixture with our series of non-penetrating roof mounts (NPRM). The options are available in 8 or 10 feet and will need a ballast weight to keep the mount in place and stable. *The ballast weight depends on the location, elevation, and roof material of the intended camera location.*

Mast heights place camera above standard roof parapets

Durable aluminum construction with powder coat finish

Concrete blocks or sand bags serve as ballast weight

Base pad to avoid damage on concrete or gravel material

COMPONENT	SPECIFICATION	
	Model B3	Model B4
Base Dimensions	2.91 ft L (0.87 m)	6.25 ft L (1.91 m)
	3.33 ft W (1.01 m)	6.00 ft W (1.83 m)
	9.69 ft ² (0.90 m ²)	37.50 ft ² (3.48 m ²)
Concrete Block Capacity	Ten	Sixteen
Mast Height	8 ft or 10 ft (2.43 m or 3.04 m)	
Mast Diameter	2.75" O.D. maximum (6.99 cm)	
Hardware	Base pad: included Ballast: not included
