

## OxBlue Time-Lapse Construction Cameras Document 17th Annual Construction Atlanta Event

ATLANTA, November 19, 2015 – OxBlue construction cameras and time-lapse videos are used by construction professionals around the world to improve efficiency, project management, and communication on projects in every sector of construction – from residential and retail to sports and healthcare facilities. Occasionally the construction webcam provider's services and tools are put to work on a different kind of jobsite, like the 17th Annual Construction® Atlanta.

Construction is a charitable organization that brings together professionals from the design, engineering, and construction industries in support of hunger relief and awareness. At annual events held in more than 150 cities worldwide, participants volunteer their talents, putting them to work building huge, complex structures made out of canned food. The works are judged in different categories, such as Best Use of Labels and Structural Ingenuity.

This year's Construction Atlanta build-out kicked off on November 5 at the Colony Square Mall in Atlanta's Midtown, and donated OxBlue construction cameras were there documenting the event. High-definition time-lapse videos of teams building their structures can be seen at <http://OxBlue.com/construction>.

Every OxBlue construction camera system comes with all hardware, cellular data connection, easy-to-use tools, and three kinds of time-lapse movie capabilities.

**“Clients use our time-lapse technology to accomplish a lot of different things. A big one is promoting their work and achievements. We're really happy to contribute our construction cameras and use this technology to help Construction promote awareness of the great work it does.”**

Chandler McCormack, OxBlue CEO

After the day-long design-build event and judging, the completed structures were showcased in a public exhibition, from November 6 to 15, and winning entries were celebrated at a November 13 Awards Gala. All the food and proceeds from the 17th Annual Construction Atlanta event are donated to the Atlanta Community Food Bank.

**About OxBlue:** OxBlue, a leading construction webcam service provider, has been making the jobs of construction professionals and project stakeholders easier since 2001. High-resolution jobsite images, high-definition time-lapse movies, and intuitive technologies connect everyone on the project to the jobsite and with each other for better project management, better communication, and a more efficient build. OxBlue construction cameras are at work across 6 continents and all 50 states, serving Fortune 500 companies and top ENR contractors. For more information, please visit [OxBlue.com](http://OxBlue.com).

Construction Atlanta kicked off on November 5 at the Colony Square Mall in midtown Atlanta. OxBlue donated construction cameras to document the event.
