

OxBlue Announces GSA Schedule 84 Award for Construction Webcam Services

ATLANTA, January 15, 2015 – OxBlue, a leading provider of construction cameras and construction jobsite monitoring technology, announced today that it has been awarded a Schedule 84 contract by the U.S. General Services Administration (GSA), the procurement arm of the federal government. The five-year contract allows government buyers to quickly and efficiently purchase OxBlue construction webcam services. OxBlue's contract is effective starting January 1, 2015 and their GSA contract number is GS-07F-057CA.

The GSA significantly streamlines and accelerates the process of procuring products and services for all federal agencies by establishing government contracts with vetted commercial vendors. OxBlue's status as a GSA Schedule 84 vendor enables government buyers to obtain OxBlue construction cameras, jobsite monitoring technologies, support services, and construction time-lapse videos at approved pricing and license terms.

“Our efforts are always directed at making things easier for everyone and now government buyers can make purchases easily through our GSA contract.”

Chandler McCormack, CEO of OxBlue

Awards are based on a rigorous evaluation of a company's financial stability, performance history, and customer satisfaction, among other criteria. In awarding OxBlue a Schedule 84 contract, the GSA recognizes the construction webcam service provider as a preferred and trusted vendor.

“Our construction cameras, technology, and client service are all designed to simplify construction project management and

The Folsom Dam Auxiliary Spillway is one of many government projects that has benefited from an OxBlue construction camera.

communication, making projects more efficient for everyone involved. Now government buyers can make purchases easily through our GSA contract,” said Chandler McCormack, CEO of OxBlue.

Every OxBlue construction camera system includes all hardware, easy-to-use technologies, and a professionally produced construction time-lapse movie. OxBlue construction webcams have been used by U.S. Customs and Border Protection, the Army Corps of Engineers, and other agencies to monitor and document government projects.

Federal, state, and local agencies can obtain more information by visiting <http://OxBlue.com/purchase/g-s-a.php> and by calling OxBlue at (888) 849-2583.

About OxBlue: OxBlue, a leading construction webcam service provider, has been making the jobs of construction professionals and project stakeholders easier since 2001. High-resolution jobsite images, time-lapse movies, and intuitive technologies connect everyone on the project to the jobsite and with each other for better project management, better communication, and a more efficient build. OxBlue construction cameras are at work across 6 continents and all 50 states. They have been used to monitor and document government projects for U.S. Customs and Border Protection, the Army Corps of Engineers, and the Department of Veterans Affairs.
