OxBlue Announces New National Installation Program

April 22, 2020 (ATLANTA, Ga.) - OxBlue (oxblue.com), an Atlanta-based technology company and leader in professional construction camera services, has announced its new national installation program for deployment of all OxBlue camera systems.

The program provides clients with a convenient full-service and fixed-price installation by an OxBlue Authorized Installer. OxBlue Installers are in all 50 states and every major metropolitan area, providing installation services to virtually any location nationwide. OxBlue Authorized Installers are verified, reliable and proven performers who ensure the job is done right.

"We're always expanding our services to meet the needs of our clients," said Chandler McCormack, CEO of OxBlue. "The national installation program comes at a time when the ability to conveniently deploy cameras for construction management is more important than ever."

Each installation is coordinated by a dedicated installation manager at OxBlue, ensuring the installation is documented and the system is installed to the client's satisfaction. Available installation services include standard camera installs, solar power station setup and installation of utility poles for better vantage points.

For more information on OxBlue and its new national installation program, call (888) 849-2583 or visit OxBlue.com.
