OxBlue and DPR Construction Announce Strategic Partnership for National Construction Camera Program

May 1, 2020 (ATLANTA, Ga.) - OxBlue, the leader in professional construction camera services, has been selected by DPR Construction, a forward-thinking global general contractor and construction manager specializing in technically complex and sustainable projects, to partner on a national construction camera program.

As part of the agreement, OxBlue will provide all-inclusive services and support for DPR Construction projects using OxBlue's cameras from inception to completion. The program includes options for the Cobalt Series (high-resolution time-lapse cameras) and the Sapphire Series (robotic PTZ video cameras), as well as the Indigo Series (a camera solution for interior projects).

"We're proud to be partnering with DPR Construction for their national construction camera program," said Chandler McCormack, CEO of OxBlue Corporation. "Our mission is to ensure DPR Construction is able to remotely manage job sites across the nation in order to drive efficiency, productivity and innovation."

"As DPR continues to strive for consistency and predictable outcomes on our projects, strategic partnerships with our long-term vendors and partners are important to maximize value," said Hannu Lindberg, DPR's virtual design and construction leader. "Having a turnkey solution for our sites, that use both onsite and automated monitoring services to document progress, helps us have a rapid deployment and support strategy for our project teams, increase remote access to monitor project progress and have a single source of truth. There is also the potential for us to capitalize on emerging artificial intelligence (AI) and machine learning algorithms to proactively monitor safety and progress on our projects. Ultimately, these lead to efficiency, cost savings, and benefits for our customers."
